

FINALLY, A GAME THAT CAN OUTRUN OUTRUN™

The original OutRun ripped through the industry like a Ferrari across Nevada. Get your bank deposit slips ready fellas. OutRun is back. And this time it's turbo-charged.

TURBO OUTRUN™ is faster, louder, and packed with more adrenalin-pumping excitement than a hot lap at the Ferrari test track. Its high-tech cabinet looks like it rolled off the Ferrari assembly line. Enhanced-resolution graphics and a sound system that could drown out the start of the Indy 500 will get players to the game. Tire-smoking action will keep them there. TURBO OUTRUN takes drivers on a four-stage race across America. Along the way they'll battle fender-to-

fender with good guys and bad guys, blown engines, and fickle girl friends. Sixteen different scenes take players through congested city streets, over icy mountain passes, and across sun-baked deserts.

Park a couple of TURBO OUTRUNS along your pit row and watch your cash flow accelerate. Call your authorized SEGA distributor for a test ride.

SEGA Enterprises, Inc., (USA), 2149 Paragon Drive, P.O. Box 610550, San Jose, CA 95161-0550. (408) 435-0201.

Continuously play for new prizes as players face the challenge of four stages and 16 separate action-packed scenes.

Blistering acceleration and a rapidly heating engine result from hitting the turbo boost button.

Players can select manual or automatic shifting. Successful completion of each stage gives players additional engine, tire, or turbo options.
